

AMENDMENTS TO THE CLAIMS

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (Previously Presented): An antisense compound 8 to 50 nucleobases in length targeted to a nucleic acid molecule encoding human apolipoprotein (a) (SEQ ID NO: 3), wherein said compound specifically hybridizes with said nucleic acid molecule encoding human apolipoprotein (a) and inhibits the expression of human apolipoprotein (a).

Claim 2 (Original): The compound of claim 1 which is an antisense oligonucleotide.

Claim 3 (CANCELED)

Claim 4 (Original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified internucleoside linkage.

Claim 5 (Original): The compound of claim 4 wherein the modified internucleoside linkage is a phosphorothioate linkage.

Claim 6 (Original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified sugar moiety.

Claim 7 (Original): The compound of claim 6 wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.

Claim 8 (Original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified nucleobase.

Claim 9 (Original): The compound of claim 8 wherein the modified nucleobase is a 5-methylcytosine.

Claim 10 (Original): The compound of claim 2 wherein the antisense oligonucleotide is a chimeric oligonucleotide.

Claim 11 (Currently Amended): A An antisense compound 8 to 50 nucleobases in length which specifically hybridizes with at least an 8-nucleobase portion of an active site on a nucleic acid molecule encoding human apolipoprotein (a).

Claim 12 (Original): A composition comprising the compound of claim 1 and a pharmaceutically acceptable carrier or diluent.

Claim 13 (Original): The composition of claim 12 further comprising a colloidal dispersion system.

Claim 14 (Original): The composition of claim 12 wherein the compound is an antisense oligonucleotide.

Claim 15 (Previously Presented): A method of inhibiting the expression of human apolipoprotein (a) in cells or tissues comprising contacting cells or tissues *in vitro* with the compound of claim 1 so that expression of human apolipoprotein (a) is inhibited.

Claims 16-20 (Canceled).
